

Percentages of Full-Time and Part-Time Faculty by FTE:

FTE was calculated using the same data and sorting methods as described for the credit-based and enrollment-based percentages. All numbers, except the current semester (spring 2009) were calculated from the courses showing on the Banner system at the end of the semester (not at the 15<sup>th</sup> day which is the information reported to the Board of Regents). Spring 09 totals (129) may vary slightly at the end of the semester from the number shown, due to cancelled Outreach courses.

Calculations were made by sorting courses into categories based on payroll definitions of faculty status. Continuing Education courses were not included in the calculations.

For Semester calculations, the percentages based on FTE were calculated using the following methods:

1. To get FTE group numbers: Multiplying the number of credits taught for the Full-Time group by the overall number of enrollments, and then dividing by 15; Repeating for the credits taught by the Part-Time group and dividing by 15.
2. Multiplying the overall number of credits taught by the overall number of enrollments taught, for an overall number.
3. Then dividing each set of group numbers in to the overall number.

For Academic Year numbers, starting with summer semesters:

1. Adding FTE numbers for each semester, per group, together and then dividing by 2.
